## COVID-19 at Camp

At YMCA Camp U-Nah-Li-Ya it is our responsibility to help maintain the health and safety of every guest we serve. Using resources from the CDC, ACA and State of Wisconsin we have developed a detailed document explaining how the Y staff at Summer Family Camp will provide a safe, healthy and quality program in the midst of the COVID-19 pandemic. Although each element of the program has specific guidelines we urge guests to at least familiarize themselves with these basic best practices:

- Guests should wash or sanitize their hands before and after every activity.
- All equipment and supplies should be sanitized before and after every use.
- Guests should maintain social distance as much as possible.
- Guest must wear masks when going through the buffet line, being harnessed by a staff member for the rock wall and when they feel it is appropriate.
- Guests should monitor themselves and their family members daily for symptoms of COVID-19.
- Guest should only participate to their comfortability—opting out is always a respected choice.
- Guests should help Y staff by following all health and safety procedures.
- Guests should bring any concerns to Y staff immediately.

Families and camp staff will need to work together to help ensure everyone has a safe, healthy and enjoyable time at Summer Family Camp. Extensive COVID policies and procedures can be found [here](#).
